

“Detailed Landscape is always a pleasure to work with—and our property has been transformed! We are continually impressed with the respectful, quiet, careful employees and the quality of every aspect from trees to flowers.”
We look forward to a long, happy future.

transforming your yard into an outdoor retreat
exacting standards • quality workmanship • courteous service

Since 1999, Detailed Landscape has provided professional landscaping and gardening services for homes and businesses in Northern Colorado. Our exacting standards, quality workmanship and courteous service have led to hundreds of uniquely successful landscaped environments, and have earned us a reputation that makes us proud.

DESIGN

Because our team includes horticulturists and installation professionals in addition to designers, our clients can be assured that their outdoor design will not only look good on paper, but will flourish throughout the seasons. Plantings and structural elements are arranged with the knowledge that a landscape will change with every season, in color, texture and size.

RESIDENTIAL

We specialize in the endless creative possibilities presented by large, full-service projects for new construction and renovation. Quality hardscapes, structural elements, water features and greenscapes come together to create outdoor spaces for entertaining, playing, reflecting and admiring. From concept and design to installation and maintenance, Detailed Landscape is equipped to transform any yard into an outdoor retreat.

COMMERCIAL

A comfortable, well-maintained landscape is an asset to any business. Business-owners who choose Detailed Landscape to design, build or maintain their exterior environment are happy to discover that both clients and employees benefit from the long-lasting beauty of our commercial landscapes. From walkways and water features, to planting beds and gathering areas, our creative team and installation professionals ensure that your workplace looks its best in every season.

BUILDERS

We partner with commercial and residential construction companies to complement new and existing projects with attractive and functional landscape. Whether you are a builder who specializes in single-family speculative homes, planned neighborhoods, community gathering places or office parks, our designers are able to create a solution that will keep your project on time, within budget and pleasing to the eye. For builders with ongoing or long-term needs, we offer comprehensive maintenance and gardening services year round.

MAINTENANCE

Regular visits by our maintenance crew will keep your residential or commercial landscape fresh and healthy. Unlike the “mow, blow and go” outfits, Detailed Landscape offers a full line of routine gardening and seasonal services to ensure that your property is in the best condition possible. Our capabilities include fertilization, weed management, pruning, gardening, holiday decoration, and snow removal.
